2021 IEEE

CONGRESS ON EVOLUTIONARY COMPUTATION
28.06–1.07.2021 • Kraków • POLAND

http://cec2021.mini.pw.edu.pl

CALL FOR SPONSORS

The IEEE Congress on Evolutionary Computation (IEEE CEC) is a world-class event in the field of Evolutionary Computation. It provides a forum to bring together researchers and practitioners from all over the world to present and discuss their research findings on Evolutionary Computation. In 2021, CEC will be held at the Auditorium Maximum of the Jagiellonian University in Kraków, Poland.

A pearl amongst Polish cities, Kraków is one of the architectural treasures in the world on the UNESCO World Cultural Heritage List. Nowadays Kraków is a seat of international institutions, companies and national culture centres. Every year numerous conferences and congresses, festivals, cultural events attract a few million visitors.

We invite you to participate in the sponsor and exhibitor program for CEC 2021. This is an excellent opportunity to promote your brand to some of the top minds from this fast evolving field. In addition your brand will have extensive exposure to thousands of viewers and readers through the publications and media reports on the conference. As a sponsor you will have full access to the conference and networking activities.

We hope it will be possible to host the conference live in Kraków as planned. However, we are observing a global health situation, which may require the conference to be held as a virtual or hybrid event, in which case the sponsorship packages will be adjusted accordingly.

Your support for CEC 2021 will allow us to expand attendance at the conference by supporting the participation of students and young researchers. In return, your brand awareness will increase. Additionally, thanks to the support of CEC 2021, you will have direct access to the highly competitive AI job market.

Based on previous CEC conferences, we expect around 500 participants from world-renowned universities, research laboratories and applied industry sectors to attend CEC 2021.
